

**STATEMENT OF WORK**  
Comprehensive Nutrient Management Plan  
Michigan

**These deliverables apply to this individual plan. For other planned practice deliverables, refer to those specific Statements of Work.**

## **PLANNING**

---

***NOTE: A comprehensive nutrient management plan (CNMP) should address all land units that the animal feeding operation (AFO) owner and/or operator owns or has decision-making authority over and on which manure and organic by-products will be generated, handled, stored, or applied.***

***NOTE: NRCS policy requires that technical assistance provided for conservation planning follow the guidance and processes in the NRCS National Planning Procedures Handbook (NPPH). For the purposes of providing conservation planning technical assistance, Technical Service Providers are to complete the actions required in the first seven Steps of the NPPH planning process. All deliverables below are based on that requirement. For detailed guidance, planners should refer to the appropriate section of the NRCS NPPH (CNMP Technical Guidance).***

### **Deliverables:**

1. Provide documentation that addresses all applicable elements in the current “CNMP Checklist” found at <http://www.maeap.org/cnmp.htm>.
2. Document that the CNMP meets all applicable local, Tribal, State and Federal laws and regulations. When applicable, ensure that USEPA-NPDES or State permit requirements (i.e., minimum standards and special conditions) are addressed.
3. Progress reporting.
